

Welcome to CHOICE!

Last Updated Monday, 21 July 2008

Choice Business Advisors, LLC (Choice) is the next-generation professional services firm serving the emerging mid-market commercial accounts; their management team, executives and key-employees. It is an international business consulting practice focused on insurance and information technology. Choice is made up of an agile sales force and professionals driven by workflow and proven methodologies that leverage every technology to exceed market expectations while maintaining limited overhead.

The purposed diversification of the service divisions are between insurance and technology.

Insurance is typically a top 5 expense for any business while technology continues to evolve with billions of dollars in research and development from major software providers invested each year for commercial entities to learn, model and implement within their organizations.

The first primary division of Choice is an international insurance solution provider selling comprehensive insurance products for every area of commercial indemnification. These products include but are not limited to property, casualty (general liability), corporate benefits (group medical), pension (401k) and professional/executive lines (errors & omissions). Each insurance product incorporates all full-service activities to support ongoing.

Choice has a second primary division that provides enterprise resource planning software solutions as a reseller of software licenses and professional services engaged for delivery and support of the solution within the customer's organization. The products are primarily the applications provided by Microsoft Dynamics, Sage Software and their independent software vendors (ISVs). Professional services include but are not limited to business intelligence (BI), document management, workflow and customer relationship management (CRM).
